

The **Preceptorship Support Platform** is an online system built to support nursing orientation programs by providing a paperless solution for documentation and process management. Each feature of the program has a specific purpose, and the platform was built in collaboration with nurses to incorporate best practices because we wanted to make nurses' lives easier.

WHAT ARE THE FEATURES?

CHECKLISTS

Online checklists that can always be accessed from any device.

- Hospitals can customize their clinical and policy checklists for each unit
- Preceptees, preceptors, and educators can track progress online
- Educational images, documents, or videos can be attached to each skill or policy

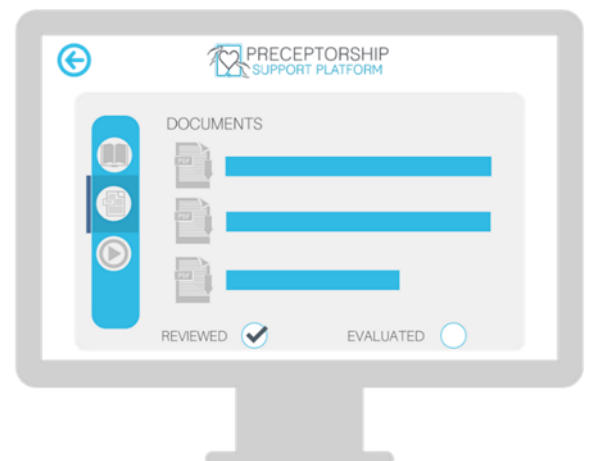

Required documentation is automatically compiled in the system.

- Each checklist sign-off is recorded, along with a time stamp and method of evaluation
- This paperless system eliminates lost documentation.

Preceptees get more feedback on each competency.

- Preceptors are prompted to give feedback with each skill or policy evaluation
- Preceptees can look back at their feedback any during and after their orientation.

Real Results

"I have determined that this product significantly outshines our past paper based orientation documentation modality. This product eliminated our past concerns with receiving incomplete or improperly documented orientation records."

- Nurse Residency Coordinator (Magnet Hospital)

PATIENT EXPERIENCES

Preceptees get a well rounded orientation.

- Orientees record their patient experiences
- A visual tool allows both orientees and preceptors to see what diagnoses and skills preceptees have had a chance to observe or assist with
- Preceptors can refer to this graph to seek the best patient assignments for their preceptees

Real Results

“This allows me to give orientees a well-rounded orientation. No one wants to come off of orientation and not know what they are doing in a certain situation.”

- Preceptor (Magnet Hospital)

MEETINGS

Preceptors get resources to help with coaching.

- Preceptors are prompted to meet regularly with their preceptees
- Meetings are structured with goal planning, discussion questions, and progress assessments

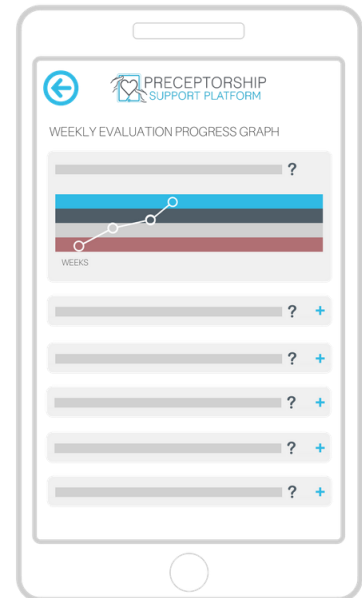

Educators are kept in the loop.

- Educators can review notes from each coaching session
- They can monitor how often preceptors and preceptees are meeting
- They can view evaluation trends and take action in real-time.

Real Results

“The Meetings tool encouraged preceptees to be more involved in the process (as opposed to the paper evaluation forms we used to use). It encouraged more conversation, and preceptors didn't have to fill everything out alone.”

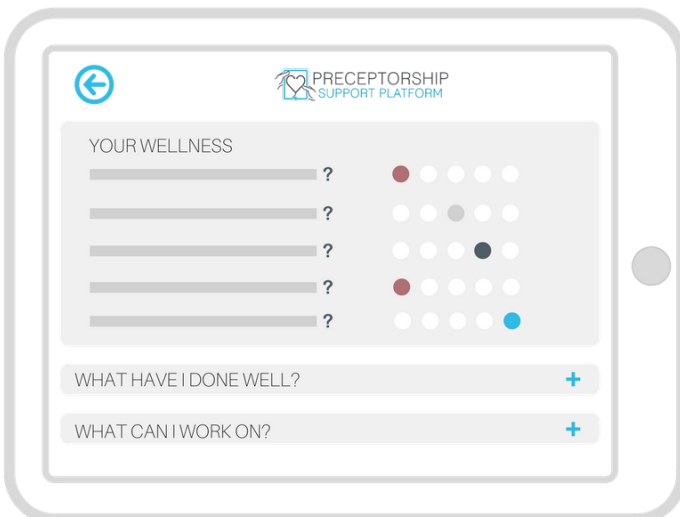

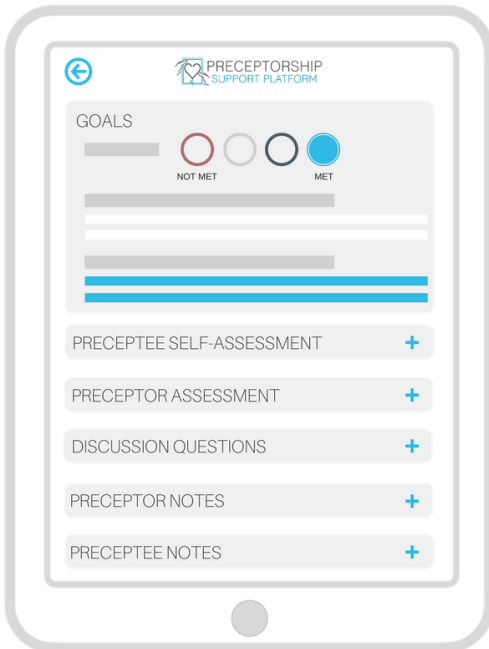

- Nurse Residency Coordinator (Magnet Hospital)

JOURNAL

Supports reflective learning

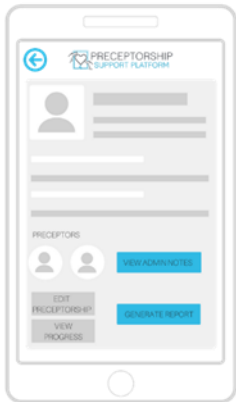

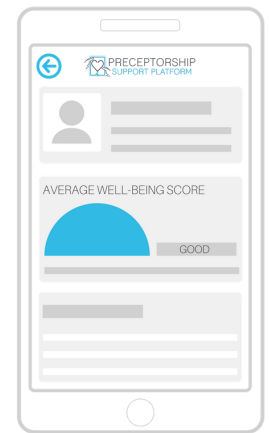

- Preceptees are prompted to reflect on learning success, needs, and well-being
- Encourages preceptees to be more self-aware and ask for help when necessary.

WELL-BEING TRACKING

Combat stress and reality shock.

- Preceptees are asked questions about their well-being with each journal entry
- Educators and preceptors will see a summary of the preceptee's well-being scores, so they can intervene when necessary.

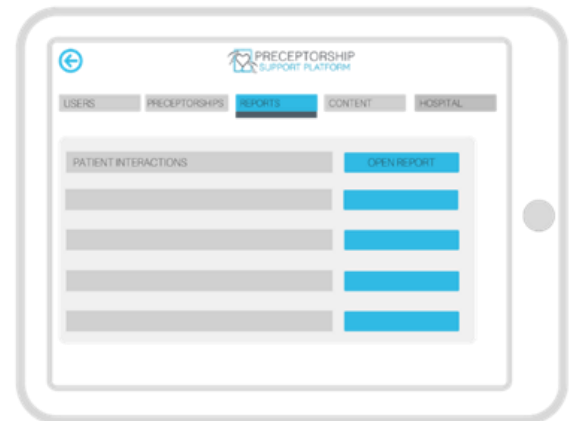

REPORTING AND COMMUNICATION TOOLS

Preceptor to preceptor communication

- Preceptors can make notes for each preceptee that other preceptors assigned to that nurse can see.
- Preceptors don't have to worry about emailing other nurses to communicate, and newly assigned preceptors can catch up quickly.

Educators can track progress and manage users

- Educators can track checklist and patient experience progress for each orientee
- They can also pull reports by unit to monitor trends

Easy required documentation reporting

- Educators can create a complete orientation documentation report with one click

OVERALL...

- The platform supports preceptees in taking professional responsibility for their own learning.
- Evidence shows that consistent feedback is essential for new nurses to succeed, so the platform is built to allow preceptors have the opportunity to submit feedback through their checklist evaluations, patient experience reviews, and structured coaching meetings.
- All of the documentation required for regulatory agencies, including preceptors signing off on each skill or checklist, is automatically recorded and is easily available for online review or printout.

Real Results

"The Preceptorship Support Platform has provided the ability for all preceptors, instructors, and leadership quick access to overall progress of the orientee – i.e. their experiences with skills, emotional well-being, and progress of skills and competency checklists. The platform allows for weekly documentation of progress between the orientee and the preceptor as well as from preceptor to preceptor for handoff. The platform also has the capability to print regulatory reports for ease of access and use during regulatory visits."

- Staff Development Specialist/Coordinator (Magnet Hospital)
